Sud Berries, Suds, and Ancient Beers. Cheers!

Lat 46.5063431,
Long -80.9866317
Sudbury Ontario

These giant honeycomb oscillators are stacked high for a reason, and there are no giraffes here to steal this stuff at all! How old? A new plaque stands in the area claiming the late eighteenth century. Phaze, froth, flavor and colour are affected by brewing facilities. Did vibrations in these large cylinders provide electrostatic precipitation rather than fermentation, or both? Farmers in the Sudbury area found Haskap Fly Honeysuckle berries, "a brand new super fruit". Might be the secret to Honey Mead.

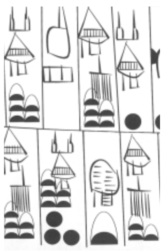

Foam, and Phase (color) on a Faxe Beer Lager

Cuneiform - Small Town Real Estate Map (Ogham)

Archaic Bookkeeping. University of Chicago Press. 1993, pp. 45-46, This is an official administrative malt and barley beer groats accounting tablet. A Raking-light proto cuneiform tablet (circa third millennium BC); Tablet is flat, text wraps edges in places, making it illegible from a single viewpoint. The right picture is a pen-and-ink style transcription of this tablet. (Photo courtesy Christie's London; illustration from Archaic Bookkeeping [Nis93].)

Giant crossbow
(*Codex Atlanticus*, f. 149a)

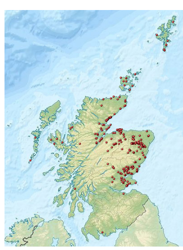

Notches on Stones in Scotland :: Ogham

So many notches on so many stones, most came to the belief that they are a language, perhaps musical, however with the distribution to the east, where the scandinavian

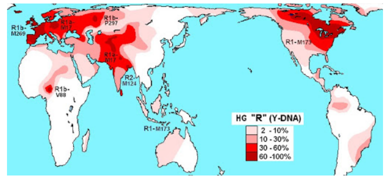

made thier retreat from the advancing and now forgotten Roman army. These notches are probably aiming artillery towards the sea. Fletcher marks. The map to the right shows the location to these ogham stones along the northern shores near New Castle, England. Then known as Pons Aelius ("Hadrian's bridge"), established around the second century after death.

Glacial Static Rebound and North Pole Wander

21,400BP (Before Present) glacial ice flow estimated upto 1 mile high covering 5.4 million miles^2 as far as Manhattan. 12,800BP after the 1000 year Younger Dryas, seasonal melt and refreeze, shaped the Canadian Shield. 7,800 BP the ice flow disappeared, and civilization returned. Scattered around North American Great Lakes there are 8 or more WarSaw. Science says geomagnetic poles reversed, 780,000 years ago.

phys.org/news/2018-11-true-polar-ice-age.html

Warsaw Caves Peterborough Also known as Giant Kettles. Some think mile high glaciers sent water melts at sub oceanic barometric pressures strong enough to blast holes in these rocks, and elsewhere. Others see the area destroyed by war. Modern scientists suspect 14,000 yrs ago glacier retreat reshaped the area. Similar kettles are found at cave entrances in eramosa Karst Stoney Creek, where no incline is to be measured, implying that no glacier had frozen over the area, or the kettle holes themselves were made after the last glacial maximum.

Fenrir the Wolf : Peterborough Petroglyphs : Bronze Age America "In historic times, it was referred to as the Fenris wolf." Berry Fell, PHD translates, "A Monstrous Wolf". From his Book Bronze Age America

"What fine, large horns I have," thought he ; " but how weak and thin my legs are ! "

"Last week she was smaller, And shaped like a bow, But now she's grown bigger, And round like an O.", "O, LOOK AT THE MOON ! O, look at the moon ! She is shining up there ; O, mother, she looks Like a lamp in the air."

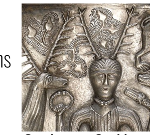

"King of the Forest"

8,000 B.C. Red Deer Skull Antler Helmet

britishmuseum.org/collection/object/H_1953-0208-1

The bones forming the top of the nose were then broken off and the edges of the remaining skull part trimmed. The rim of the brain case smoothed and interior projections cut and scraped. The antlers were also broken off and the remaining stumps thinned down and trimmed around the base. The two holes in the back of the skull, one through each of the parietal bones, were made by cutting and scraping away bone on both sides.

Paupers in AlmHouses 1923

United States. Bureau of the Census

At a time where the USA population was 111,000,000 or 1/3rd the size it is in 2020, approximately 78 thousand were in almshouses. Long buildings for healthy living.

books.google.ca/books?id=R7WxAAAAIAAJ

CONESTOGO, TRIBESMEN, AND THE GREAT DIVIDE SETTLERS

Established towns seen from satellite maps give new insights to "settlers". Settlements in law courts resolved long time land owner differences. Fresh starts inferred from paper scraps.

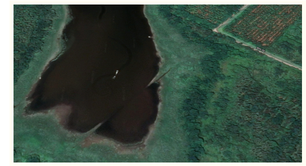

Conestogo was "settled" in the 1820's. Wyandotts date 1600 AD to 1800 AD on maps stamped 1971. People occupied and cultivated the land as natives, aboriginals, first peoples and pioneers for hundreds, upwards thousands years prior.

allthatsinteresting.com/moon-eyed-people

Wyandotts are Midævil Wind Moats

Wind Moats are "*Wyand*" pronounced (wind), "*dotts*" (*moats* where *oats* grow). Ontario's oldest sawmill? Powermill? Accidental spark gap generator? You be the judge as this abandoned area sits in Wyandot, Mapleton, Ontario. A cultivated moat where an industrial yard lays waste. Conestogo island downstream. Wyandots reach as far south as Ohio! **goo.gl/maps/itqMekEFMQuR47VU6**

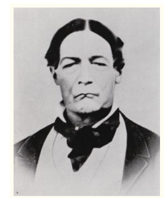

4th Line Belwood Lake

goo.gl/maps/Vw2TCBeXa6pQqdZ89

The Quarry, Walkers Line, Walkerton, Highway 7, Rockwood and Rockcut

Belwood Lake Conservation Area sits a perfectly straight bridge road sunken into a pond. An extension to Walkers line beginning at Mount Nemo's North bend, ending at South Gate Ontario. This ancient walk passes Orton north, 6km at Eramosa intersection at Garafraxa, where 4th line turns into 5th. The Rock Wood quarry may be evidence to advanced early age gladstone brick works, used to build Dealer Wares. Through BruceDale, we might imagine a Spruce Tree and a place to drink some ale, in the Dale. On to 5th line, the same straight line, to Eramosa Karst.

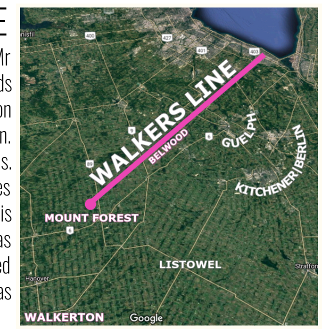

William Walker

1800–1874

Wyandot

WALKERS LINE

Who walked first? Mr William and thousands from Palmer in Burlington all the way to Walkerton. Alm houses. Palm Houses. Long Houses. Maybe trees you make balm from? This is anybody's guess as eternal ancestry passed word from mouth has survived ice ages.

Mount Forest, Ontario ➶ follow the arrow to the purple Dot at Walkers Line end.

The last stop to a 100km straight path. Ending in a perfect radius circular moat bending the river. There are no big mountains or hills here, and there is little remaining forest. Known as Maitland Hills when the Saugeen River was the Maitland River. Francis Kerr surveyed the Village into lots as the name changed to Mount Forest in 1853. **wellington-north.com/visiting/history-of-wellington-north**

200m Radius Circular Moat

South Gate, Ontario

LAT 43.993956, LNG -80.696928

This area is named South Gate. No really. It is. South Gate, Mount Forest, Ontario. What appears as a crossing bend in the river could be a "gate". See it yourself on Google Maps.

goo.gl/maps/MWrz2AFfVdxtQjPr6

75m^2 Bridge Platform

There may be a much older Kerr line, beginning somewhere in Oakville, reaching as far as lake Huron? Believe it or not! A Kurve. Start your maps at @43.550547, -79.849298
